| <b>Situation:</b>                                                                                                   | <p>Brandenburg: Tractor-trailer with Tesla batteries breaks through guardrail, falls down embankment and catches fire</p> <p>It happened on Thursday night, around midnight, at the Spreeau junction: the truck was driving from the A12 towards the A10 when it skidded, hit a crash barrier and fell off the embankment. The truck lost parts of its load, apparently all the Tesla batteries. Then it caught fire.</p> <p>The trailer ended up on its driver's side and was completely crushed. The driver was trapped. A witness and a first responder extinguished the fire before it could spread to the entire truck.</p> <p>Fire departments from surrounding cities and also from Berlin arrived and immediately started rescue operations. Even the fire department of the Tesla factory was on site. The truck driver was freed from the wreckage with heavy technical equipment and made suitable for transport in an ambulance.</p> |
| <b>What needs to be explored, what are the possible risks or special dangers of this vehicle in this situation?</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>What command is given? Write down in order of priority:</b>                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>What special dangers does this accident present?</b>                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
