

Lesson plan 3 Technical rescue deployment (THV) exercise

Exercise	THV exercise	
Subject	Accident entrapment	
Scenario	A vehicle sideways into a tree with a victim	
Location	Practice site	
Practice goals	General goal: • Safe and effective rescue of victims Specific goals: • Investigate and observe accident with the CRS • Recognise risks of modern propulsion • Deactivate vehicle • Stabilising a vehicle • Cooperation with TAS and HV (communication and division of tasks) • Using hydraulic tools and stabilisation equipment	
Skills	Investigation/observation Look up information via CRS Analyse and assess situation Control/stabilise incident Plan, plan+ Communication	Stabilisation of accident Learn and reflect
Target group(s)	TAS team	HV team
Timeline	60 min	

Lesson plan 3

Practice	THV	
Exercise	Accident entrapment	
Scenario	A vehicle sideways into a tree with a victim	
Call-out report	Prio 1 Serious accident entrapment. TS HV (and OvD) Address: use known street name in the catchment area	
Information	Report comes from a witness who is still on site. A vehicle has hit a tree sideways and one person is trapped in the vehicle.	
Weather/time	As is	
Water extraction	None (only the TS tank)	
Staging and information	Deform a practice wreck with a crane or something similar. or order a pre-deformed practice wreck. Push the B pillar inwards a bit. Place the vehicle with the dent against a tree, post or the corner of a container. The victim is trapped on the dented side with his lower leg between the door, sill and the pedals. Take the number plate of a hybrid vehicle. Place a cleaning cloth with some petrol or diesel on it on a piece of cardboard under the tank. Do not use too much fuel, but just enough that it is smelled by the TS. Preventing fire and disabling the vehicle must be a priority during this deployment. As an ambulance nurse, give instructions that the victim must be freed with as much space as possible. Print a number plate and logo and stick them on the practice wreck. Safety: With practice wrecks, always pay attention to the presence of not yet activated airbags and seatbelt pretensioners! These can go off in an uncontrollable manner due to cutting and dispersing in the gas cartridges or modules.	
Materials/equipment	1 practice wreck 1 victim (dummy or simulant) TAS and HV Forklift truck	Number plates (magnetic) Car number plate Print a logo
